

Exhibit I

This FCC license is being requested to provide Satellite RADIL-J capability to the Lockheed Martin MS2 Facility in Moorestown, NJ. It is required to support the development and requirement sell-off for the Aegis Ballistic Missile Defense Programs, contract number N00024-03-C-6110. This Missile Defense Agency is tasked with developing a multi-tiered shield capable of defending the United States against the threat of ballistic missile launched by rogue governments per National Security Presidential Directive 23. The Aegis Ballistic Missile Defense Program is one layer of this program.
