FCC File # 0335-EX-ST-2006

---

Message:

The EIRP for the L-3 / Datron FSS-4180-LP terminal is 41.9 dBW.

Please note that we plan to build and test two of these platforms and it is likely that they will be operated in two separate locations as specified on the submitted application. Mr. Douglas Young of the FCC Experimental Licensing Branch suggest that only one STA was needed for the two terminals.
