

Consent to *Pro Forma* Transfer of Control

This Exhibit A accompanies an application pursuant to which LoJack Corporation ("LoJack"), a Delaware corporation based in Canton, Massachusetts and a wholly-owned subsidiary of CalAmp Corporation ("CalAmp"), a Delaware corporation located in Irvine, California, seeks consent to a transfer control of its experimental authorizations. The transfer of control is necessitated by corporate restructuring whereby LoJack will be merged into CalAmp Wireless Networks Corporation ("CalAmp Wireless"), a wholly owned subsidiary of CalAmp.

The proposed restructuring is *pro forma* and will not affect ultimate control or ownership of the licensee since the entities remain under the ownership and control of CalAmp. The merger, however, will result in a change of licensee to CalAmp Wireless, a Delaware corporation, based in Irvine, California.

Grant of this request will enable CalAmp Wireless to continue the important work, started by LoJack, in testing of new vehicle and equipment theft-recovery products using its experimental licenses. The authorizations are operated under the call signs KS2XBH, WH2XYS, WD2XYL, and WM9XTR
