Subject: Transfer Control Application

---

Message:

The following responds to an email from Behnam Ghaffari, dated October 18, 2018, Reference number 44572, to Chris Rowland, LoJack Corporation, regarding the processing of application File No. 0051-EX-TU-2018.

You have asked whether there will be any additional applications for transfer of control filed with any other FCC bureaus. There are no other transfer of control applications contemplated except an application to modify LoJack's equipment grantee code to CalAmp Wireless Networks Corporation. That application will be filed with OET closer to the date of merger.
