Message:

To date the use of the experimental license has been nationwide to accommodate the Government's request for work at our Whippany, NJ location as well as at Government locations at the Patuxent River Naval Air Station, Maryland and at Camp Pendleton, CA. We are currently working on the Government Future Combat Systems - Communications program which has plans to work at additional Government locations at Lakehurst, NJ and at Boise, ID. We are requesting nationwide authority due to the unpredictable nature of what future locations that the Government may request us to work at and our need to respond quickly to their requests.
