Washington, D.C. 20554

Dear Zina:

In reference to the attached letter reference #1300A4-ZME, to us about our use of the Inmarsat M Unit, we wish to indicate the following information:

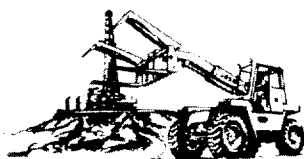

Lyman Bros. plans to use the Inmarsat Unit for emergency situations such as Forrest Fires, Hurricanes, other natural disasters and man made emergencies. We also plan to use it with private companies at mine sites and drilling sites where there are no other means of communications available. Our company provides communications in circumstances where speed is of the essence and there are generally no permanent means of communication available.

We have also attached the signed original certification page. If there is anything else needed please let us know.

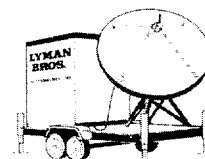

Sincerely,

Mat Lyman
President
