Dear Sir:

Enclosed you will find a certified check for \$50.00

I am applying for an Experimental License. Form 442, was submitted electronically (I hope).

I am justifying my application based on 47 CFR Part 5 Subpart E with specific references to the following sub-paragraphs.

5.202 Scope of Service

- a.** Experimentation in scientific or technical radio research
- d.** Technical demonstrations of equipment or techniques.
- e.** Demonstration of equipment to prospective purchasers for proposed stations in existing services by persons engaged in the business of selling radio equipment.
- i.** Development of radio technique, equipment, operational data or engineering data related to an existing or proposed radio service.

To further reinforce this proposal please observe my web page (www.malloycommunications.com). We are involved in the development of broadbanded antennas and need a way to test these products from time to time.

Also, Malloy Communications is involved in the development of technical documents that are shared with the engineering community visa via published articles in this domain.

With that I respectfully submit my proposal.

Regards,

Mike Malloy
