Subject: Experimental License

Dear Mr. Kennedy

In reference to our phone conversation and follow up email (Confirmation # EL [REDACTED]), I have filed electronically form 442, with an FRN # 0005 0192-94.

In your email you had referred to the fact that the Experimental License are good for 2 years, and I was requesting a 5 year license. Because my work is on-going and not tied to a University project or research grant I don't see an end to what I am doing. Plus, we are in business to make money as well as generate technical reports.

If necessary, I will accept the 2 year license, but there is no end in sight for my work, unless I go out of business.

I am also attaching a letter that will accompany my 159 form justifying my request for this license. You will find specific references to the CFR.

With that I respectfully submit my application.

Mike Malloy
