Attention: Wholesale Lockbox Shift Supervisor

Dear Federal Communications Commission:

Find enclosed a copy of an application for an experimental license for a PHS system. This system is being installed in our lab to test and verify the functionality of our equipment that is installed in their COT equipment. They are sending us equipment to use in our Development and QA lab to verify the functionality of our product. The equipment supplied by UTStarcom has very low output power (10mw-average, or 80mw-peak) and is in compliance with RCR Standard 28 Version 2 (PHS). This specification controls the output power and bandwidth of the output signal.

I have listed the equipment in the application, that is being supplied UTStarcom us for our lab. Please process this application as quickly as possible.

Regards,

Darrel Peterson
Director of Hardware Development
Mapletree Networks
