EXPERIMENTAL RADIO PROGRAM

This application for an experimental FCC radio license will be based on community styled outreach programs. The central philosophy is the breakdown of the barrier that keeps White American, Hispanic American, Oriental American, Jamaican American, African American from understanding the important relationship to each other, as ingredients in the melting pot of American which entitlement bestows on all the benefits equally, without the trapping of race mindedness. Included are such groups under Caribbean culture, which we may term for identification purposes, Trinidadian, Bahamians, Guyanans, Jamaicans, Central Americans, Hondurans, and Nicaraguans, within those countries there is a gerth of racial undertow and conflict. Existing in those groups are identifiable ethnics, i.e. East Indians, Chinese, Latin Indians, Africans, and other mixed groups and White European descendants. Our methods and ways will bring about more interaction on a community level basis, lessening, if not, able to quiet hostilities that currently exist between those groups.

We shall engage people in community actions, such as voting, target drug dealers, and assisting each other in reporting crime. Hopefully, we will learn to understand, there are many common areas between the groups, that reach beyond the ethnic boundaries.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof or abridging the freedom of speech, or the press or the right of the people peaceably to assemble and petition the government for a redress of grievances. We shall attempt to teach the community at large of the mutual benefits of association, community participation for understanding open discussions of religious concepts.

We will address all domestic violence with impartial fairness. We shall participate with men and women to find the problems, which underlines the risk factor for violence. This includes childcare, child support and child participation beyond the concept of current intervention. We will attempt to eliminate the lies and restrictive allegations that, condemns one parent and lifts up another parent unfairly. Our scope of focus will be with children as observers, rather than participants so as to monitor the introduction of the actual conditions of stress that the children live under, measured by the violence in the home.

Music is the central part of our experimental concept through radio. Our approach to music is not to be entertained by music, rather to entertain music. So as to capture the vibratory magics within music's equation of higher maths purposes. The sole goal of this concept is to uplift one and hopefully to alleviate the madness we have produced, in the last forty years. Is it any wonder our children are not prepared emotional to assume the awesome responsibility that society demands.

EXHIBIT II

The overview of our experimental radio program is, if we adhere, stay within the structure demanded by our choice of subjective matter.

We will have more than a normal success story. In fact, it is possible to create a future way of looking at this area that could possibly be used as a model nationwide.
