

EXHIBIT 1

- A) No research or experimentation is to be conducted.
- B) The Inmarsat Terminal is to be in Ethiopia in conjunction with exploration for natural energy resources. The terminal will be used in the U.S. for testing data communications equipment to be used overseas, and for commissioning the unit.

EXHIBIT 2

This is intended to be a permanent requirement, and will continue for the useful life of the Inmarsat Standard "A" satellite communications system.
