

**MDS AMERICA, INC.
EXPERIMENTAL STATION WC9XKW
REQUEST FOR EXTENSION OF
SPECIAL TEMPORARY AUTHORITY
EXHIBIT ONE, Page 1 of 1**

PUBLIC INTEREST STATEMENT

MDS America, Inc. (“MDSA”) respectfully submits the foregoing application for a six-month extension of the Special Temporary Authorization (“STA”) to operate an experimental station under Call Sign WC9XKW. All information concerning the experimental plan and technical parameters remains the same as that reported in MDSA’s original application for STA, File No. 9738-EX-ST-2005. All attachments to that application are incorporated herein by reference.

MDSA was unable to commence its experimental program during the first term of the subject STA, due to contractual issues with the testing and consulting firm that would assist MDSA in conducting its experimental program. Those issues have now been resolved, and MDSA is ready to move forward immediately upon grant of this extension request.

For all foregoing reasons, and as demonstrated in File No. 9738-EX-ST-2005, the proposed experimental operation would serve the public interest, and MDSA therefore respectfully submits that the requested extension of STA should be expeditiously granted.
