

Metro Telecom, Inc.

FCC File No. 0008-EX-P/L-1998

Amendment to Application

The above-referenced application for experimental authority is hereby amended by submitting the attached replacement Exhibit No. 1 to the application. The primary purpose of the amended exhibit is to correct the geographic coordinates for the proposed base station transmitter locations. Due to a clerical error, incorrect coordinates were provided for two of the locations in the application as filed. No other substantive changes have been made, although the exhibit has been reformatted and some non-substantive clerical and typographical errors have been corrected.

Respectfully submitted,

Gary G. Schumiacher, President
Metro Telecom, Inc.
