Subject: Miami-Dade County STA Request
Importance: High

Good afternoon Mr. Ghaffari,

Attached please find PSST's consent to the Miami-Dade Experimental License Application, file number 0520-EX-PL-2011. In addition, attached is a letter defining the project as planned.

Further, the system power output will be 8 W, and the ERP will be 400W.

The ERP power for the portable units is 250 mW, and the emission designators are: 4M50Q7D and 4M50V7D. This is because of the fact that, in the uplink, the eNodeB will select the uplink modulation scheme. In other words, depending on the location, the portable unit may transmit in QPSK or 16QAM.

Please feel free to contact me if you need any additional information.

Thank you for your assistance with this matter.
