Washington, DC 20001

To whom it may concern:

The enclosed FCC Form 442 and attached exhibits comprise an application for an Experimental Radio Service license for Microwave Bypass Systems, Inc. Microwave Bypass Systems specializes in connecting computer networks with private, fixed 23 GHz microwave radios.

Microwave Bypass Systems plans to use the Experimental Radio Service license to conduct demonstrations of equipment and to evaluate the compatibility of the system with existing computer networks. Microwave Bypass Systems will coordinate each path with an independent spectrum planning consultant before beginning any transmissions to avoid interference with existing or proposed radio facilities.

If any further information is required please do not hesitate to call me at 617/843-8260.

Respectfully submitted,
