

## Use of the Experimental License

Microwave Data Systems, Inc. (“MDS”) manufactures many wireless products. The engineers of MDS are constantly changing and improving software, and having this type of experimental license allows the engineering staff to validate new software changes in a real world situation.

Use of the Experimental license is no longer required on a nationwide basis. MDS’s use of the license is, at this time, concentrated at its headquarters located in Rochester, New York. With the exception of the changes indicated below, the remaining licensed data remains the same.

The technical parameters of the license at the site-specific location are:

Latitude 43-07-6.2N Longitude 77-36-42.0W  
Ground Elevation: 163.0 meters  
Location: 175 Science Parkway  
Rochester, NY

Should any questions or concerns arise regarding the change to the area of operation (from nationwide to site-specific) of the WA2XSD license, please communicate with Dennis McCarthy, Agency Compliance Engineer at (585) 242-8440.
