

Exhibit 1

Microwave Radio Communications, a manufacturer of microwave communications equipment, hereby requests authority to develop and test equipment, to demonstrate its equipment to potential customers, and other uses pursuant to Section 5.3 (d), (e), (f) and (g) of the FCC Rules.

Operations will be in the following frequency bands, and the technical specification will comply with applicable FCC technical rules:

150-174 MHz
1990-2110 MHz
2450-2500 MHz
3650-4200 MHz
5925-7125 MHz
10550-10680 MHz
10700-13250 MHz
17700-19700 MHz
21200-23600 MHz
24250-25250 MHz
31000-31300 MHz
37000-86000 MHz

We understand that operation in certain frequencies above 40 GHz may not be permissible, and we are willing to accept conditions or the elimination of those bands from the list of authorized frequencies.

Microwave Radio Communications will assure that its operations will not cause interference to other licensed operations by coordinating in advance through an appropriate frequency coordinator.
