J Kennedy of FCC request for further information, 03/30/2005

Dear Mr. Kennedy,

I appreciate your prompt response and have updated the application as you requested. I first filed with the maximum transmitter RF Output but never planned on radiating more than 100 mw. We will attenuate the RF Output signal to the minimum level required to obtain receiver lock while walking around the convention building to demonstrate that the COFDM signal is almost impervious to multipath. The transmitter will be attached to a camera for this demonstration. We anticipate that all of the demonstrations will be indoors but may do a few outdoors.

We have coordinated our frequency assignment, for Channel 8, 2458.5 MHz of the 2 GHz BAS, with Mr. Jack Smith, the authorized Spectrum Coordinator for that geographical area.

Sincerely yours,

Daniel Shine

Director, Sales and Marketing
