

Antenna Location - Orbit

The communication station for which the Experimental License is requested is a satellite. The satellite is a 1U CubeSat that will be deployed from the International Space Station. The deployment orbit is as follows:

Apogee: 424 Km

Perigee: 402 Km

Inclination: 51 deg

The satellite is equipped with propulsion. It is expected to perform controlled reentry at the end of its mission.

Additional information on the reentry are included in the ODAR (Orbital Debris Assessment Report) document.
