42°30'19.0"N 71°14'05.0"W is the location where this fixed antenna (dish) transmitter will be located

42°9'43.67"N 70°42'22.99"W is the receiver location (no transmit).

The distance between the fixed transmitter and the receiver is less than 60km. I have therefore entered 60km as "radius of operation";
