Works great

Easy installation with plenty of cableto allow concurrent installing with minimal interference of other cable. Raised barely one bar to three our four at most times. Highly recommend to anyone with signal concerns.

Great job

I have had mine for 4 weeks mounted temporarily on a ladder and the cable runs under my door. It does a wonderful job except when it is very cloudy and I get some static. No service when it rains on my cell phone but some service on my house phone.

Primary Use: Home

☑ Yes, I recommend this product.
