Dear Mr. Ghaffari,

Yes we have added two additional locations.

Please resubmit to NTIA, thank you for explaining that this will cause delay, however, it is inevitable at this point.

The new Naperville location is actually the first planned usage of the device, but it looks like there might not be time for NTIA to complete their review.

Nevertheless, we do want all the additional locations if at all possible.

Sincerely,

Charles F. Radley

Mr. Radley,

I just noticed that you have added two more locations (Naperville, IL and Charlotte Hall, MD) to your application; even though you may amend your application at any time but by doing so you would prolong the application processing time. This application was originally (5 locations) sent to NTIA for their review and approval and now there are 2 more new locations added that have not been looked at. If you would still like to keep these 2 new locations on your application I will have to send this application back to NTIA for their consideration; otherwise, please remove those 2 locations from the application.
