

MOTOROLA

GSM Products Division

Exhibit number 1

To Federal Communications Commission
From William Vehe

20 Feb, 2003

Subject: Modification request for Experimental License - WC2XLI

The purpose of this license modification is to request approval of two changes to the current experimental license for station call sign WC2XLI.

First, The person who renewed the current license last November, and whose name appears on the current license no longer works at Motorola. The appropriate contact information has been updated in this application. Second, we are requesting an increase in the number of allowable mobiles covered by the current license, from one to a maximum of 32 mobiles.

The additional mobiles are needed to allow actual on the air testing of Motorola UMTS wide band CDMA cellular base station equipment, under conditions of up to a maximum traffic load. The testing planned consists mainly of drive testing close to the Motorola facilities specified in the current license.

Thank You

William Vehe
