Thank you for the rapid response concerning this mission critical situation. I could not find an area to add comments via the url you attached. Therefore I am replying directly to you. Please let me know if that is okay.

The five year time frame is not an absolute requirement. We can request re-newels on a yearly basis if necessary. The five year period is for new technology roadmap development.

The market study was completed in the early development of iDEN technology some 10 years ago and is not required. We are developing new features for the Nextel markets.

Dear Mr. Tony Bolden:

Please justify the need for a five-year experimental license.

Also, please indicate if a market study test is to be performed under this experimental license. If so, please answer the following questions:

What contractual or financial arrangement will Motorola have with the customers who will be participating in the market study test?

Will Motorola retain ownership of the devices during and after the market study test?

Confirmation Number: EL12295
