Re: Experimental Radio License WB2XCJ
Notification of Commencement of Experimental Operations
Location(s): Los Angeles, CA; Frequency(ies): 800 MHz channels

To the Commission:

In accordance with the authority granted by the above-referenced experimental license, WB2XCJ, File No. 0126-EX-RR-2005, this is to notify the Commission of Motorola's intent to conduct a test under the parameters of its license (attached). Pursuant to condition 9 of the license, this notification is being electronically submitted and provides pertinent technical information for the intended test as follows:

Purpose of Test:	Motorola, the City of Los Angeles, and potentially other area public safety agencies seek to determine coverage and key attributes of a new spectrally efficient data technology.
Area/Address of Test:	Los Angeles California area; 25 mile radius of Mount Lee 34-08-5.7N; 118-17-14.5W (NAD 83)
Test Start Date:	September 1, 2006
Test Completion Date:	March 1, 2007
Number of Base Transmitters:	One (1)
Center Frequency of Base Operations:	855.0625 MHz
Center Frequency of Mobile Operations :	810.0625 MHz
Emission Designator:	17K7D7D
Power of Base Transmitter:	500 Watts ERP
Power of Mobile Transmitters:	40 Watts ERP
Maximum Number of Mobile Transmitters:	Ten (10)

Motorola has coordinated this test with co-channel licensees operating within the potential reception range. In addition, Motorola will have the capability to disable the base station equipment remotely from its 24 hour customer system support center in the unlikely event that doing so becomes necessary. Motorola will use other 800 MHz channels under the same conditions specified in this letter if needed.

Should you have any questions regarding this notification or need further information, please contact Stu Overby at voice (847) 576-2952; email: Stu.Overby@Motorola.com or Motorola's FCC counsel, Kurt DeSoto of Wiley Rein & Fielding LLP, at voice: (202) 719-7235; facsimile (202) 719-7207; email: kdesoto@wrf.com.

Respectfully submitted,

/s/

Stu Overby
Director, Global Spectrum Strategy
Motorola, Inc.

(File Number)

NAME MOTOROLA, INC.

Subject to the provisions of the Communications Act of 1934, subsequent acts, and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions and requirements set forth in this license, the licensee hereof is hereby authorized to use and operate the radio transmitting facilities hereinafter described for radio communications in accordance with the program of experimentation described by the licensee in its application for license.

Operation: In accordance with Sec. 5.3(h, i) of the Commission's Rules

Station Locations

- (1) Nationwide; MOBILE: Nationwide
- (2) Ft. Worth, TX - NL 32-45-14; WL 97-20-10; MOBILE: Ft. Worth, TX, within 80 km, centered around NL 32-45-14; WL 97-20-10
- (3) Arlington Heights, IL - NL 42-05-42; WL 87-58-55; MOBILE: Arlington Heights, IL, within 80 km, centered around NL 42-05-42; WL 87-58-55

Frequency Information

Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.

Special Conditions:

- (3) Any operation in these bands must be coordinated with the existing and future users to avoid interference. Emission types may vary under the experiment.
- (4) Operation in the 1850-1910 or 1930-1990 MHz band requires prior frequency coordination with 2 GHz microwave users and consent of PCS licensees to avoid interference.
- (5) Prior to equipment authorization or a determination of compliance, the device must be accompanied by a conspicuous notice worded as follows: "This device has not been authorized as required by the rules of the Federal Communications Commission. This device is not, and may not be, offered for sale or lease, or sold or leased, until authorization is obtained."
- (6) Operation in the 824-849 or 869-894 MHz band requires consent of local cellular licensee(s) to avoid interference.
- (7) NO market studies may be conducted under this authorization without further approval.
- (8) Licensee is authorized to operate up to 10 base stations and 200 mobile units for each individual experiment. Licensee shall not operate more than 50 base stations and 750 mobiles for all experiments combined under this authorization. Operation of additional base stations and mobile units must be requested with sufficient justification.
- (9) Licensee is authorized under Section 5.75 to test, demonstrate and operate prototype products in the above frequency bands. Licensee is required to notify the Commission of the specific details of each individual experiment, including location, number of base and mobile units, power, emission designator, and any other pertinent technical information. No operation shall take place until the Commission has received the required notification. This notification should be uploaded electronically via the OET Experimental Licensing Branch's Electronic Filing Web Site at https://gulfoss2.fcc.gov/prod/oet/index_els.html using the "Add Attachments" feature.
- (10) Operation in the band 1910-1930 MHz is subject to prior coordination with existing and future fixed microwave service licensees in accordance with 47 CFR, Part 101.103(d).
