Subject:

FCC File # 0354-EX-ST-2006

Message:

Mr. Kennedy,

This is to follow up our discussion today about the above-referenced STA application and inquiry.

As indicated on Page 3 of the attachment to the application, Motorola will not perform a market study under this experimental license.

Motorola lists four company office/laboratory locations that are in close proximity to one another near its corporate headquarters in Schaumburg, Illinois. Thus, there are actually fewer locations than suggested in the application. Motorola has also indicated that it requested two base stations at each site so that it could use one as a primary transmitter and the second as an interferor. Nevertheless, it agreed that it could conduct the test with only one base station per site if that would facilitate the issuance of a grant.

Respectfully,

Kurt E. DeSoto
