NAME Motorola Solutions, Inc.

Subject to the provisions of the Communications Act of 1934, subsequent acts, and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions and requirements set forth in this license, the licensee hereof is hereby authorized to use and operate the radio transmitting facilities hereinafter described for radio communications in accordance with the program of experimentation described by the licensee in its application for license.

Operation: In accordance with Sec. 5.3(i) of the Commission's Rules

Station Locations

- (1) Schaumburg, IL - NL 42-02-39; WL 88-02-36; MOBILE: , within 9.5 km
- (2) Palatine, IL - NL 42-06-11; WL 88-01-24; MOBILE: Palatine, IL, within 9.5 km
- (3) Plantation, FL, FL - NL 26-08-52; WL 80-15-14; MOBILE: Plantation, FL, within 9.5 km

Frequency Information

Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Operation will begin when the Commission grants the requested experimental license and will continue for no longer than two years.
- (3) MSI has analyzed information in the FCC's license databases and states that the proposed operation would not interfere or create a significant potential for harmful interference with any public safety operations in the 700 MHz band. The Illinois State Police, which use a portion of the subject frequencies for narrowband operations under a previous band plan, have concurred in MSI's proposed experimental license.
- (4) Operation of the experiment will not be used in mission-critical operations or in the delivery of live transmissions in duties to protect life, property, or safety. Operations will be confined to a 9.5 kilometer radius of the three base station sites listed in the application.

Special Conditions:

- (5) In case of interference issues, "stop-buzzer" contact for these experiments: Mark Solak, Project Manager, 847-576-3081 (office); 847-341-0223 (cell); CELX58@motorolasolutions.com.
- (6) MSI understands that an experimental license only permits shared use of the subject radio frequencies and that it may have to coordinate with other entities licensed for experimental purposes. MSI further understands that a separate concurrence from FirstNet will be required for renewal of this license.
- (7) All experimental operations by MSI will be secondary, meaning that they must not cause interference to narrowband or broadband operations authorized on a primary basis, including in the spectrum licensed to FirstNet. Narrowband or broadband operations authorized on a primary basis, including in the spectrum licensed to FirstNet, have no obligation to mitigate any interference that such primary operations may present to the MSI experimental operations.
- (8) FirstNet has not yet deployed in the geographic area covered by this application. MSI understands that if, during the term of this license, FirstNet or its assigns or lessees, plan to deploy in this area, MSI may have to reduce the coverage or power levels of its experimental transmissions or cease them entirely.
