

REQUEST FOR EXPEDITED TREATMENT

As discussed in the accompanying "Narrative Statement," Motorola Solutions, Inc. is a leading manufacturer of mobile radio equipment and systems, and it is continually engaged in the design and development of new and innovative solutions. The experimental authority requested herein will allow the company to demonstrate the functionality and reliability of prototype devices designed to support the needs of potential users.

MSI was recently asked to conduct the demonstrations proposed in its application commencing on January 15, 2019. Accordingly, MSI respectfully requests expedited treatment of its request so that it may commence operations on that date. It is unable to re-schedule the demonstrations, as the representatives attending the demonstrations cannot readily participate at another time. In addition, MSI seeks to provide data regarding the results of the demonstrations at follow-up meetings with the representatives to be held during the weeks after the demonstrations.

Also, please note that MSI does not propose to market, sell, or lease prototype equipment to end users under the requested authority. Moreover, no fees will be charged to entities evaluating the equipment during the demonstrations. After the experimentation ceases, MSI will recall and recover all experimental devices.

PUBLIC INTEREST STATEMENT

MSI submits that expedited processing of its request for an STA is in the public interest, convenience, and necessity, as it will permit MSI to conduct timely tests and demonstrations that will support its research and development of innovative and reliable equipment designed to the communications needs of potential users.
