Subject: 0172-EX-RR-2012

Dear Mr. Ghaffari

I discussed the licensing issues for the frequencies 764.0125, 790.5, and 795.5 MHz with Ms. Harrison of NTIA and have come to the conclusion that they will not approve those frequencies because they have a policy of “no renewals” and will require me to start with a fresh application.

As a result, I would like to proceed with the existing renewal but minus those affected frequencies. Is a renewal that is not identical to the original license permitted? If so, how would I go about modifying my application to reflect the change?

Thanks,

Tom Rubinstein
