

Erika,

Be advised I have been out on Jury Duty the last two days and unavailable as a result. As frequency coordinators our responsibility is to facilitate the communication between users and, as you and Beacon have coordinated the possible interference issues, I as the local coordinator will clear your use of these frequencies pursuant to the agreement forwarded by Janelle Vina and attached.

Daniel Collins

Subject: RE: OAS 700 MHz Inquiry

Dan,

As Janelle mentioned below, we need to submit the application by tomorrow. Would you be able to send us an email today stating that the Society of Broadcast Engineers approves of this event? Please give me a call if you foresee this being a problem.

Thanks again for you help.

Subject: OAS 700 MHz Inquiry

Hi Dan

Just wanted to write and follow-up on the documentation I sent you yesterday afternoon in reference to the 700 MHz Emergency Back-up System for the OAS (Organization of American States) Conference. Just wanted to know if you had looked it over as well as to see if there were any questions or concerns regarding our system and its operation.

As mentioned earlier we are in the process of applying for temporary license with the FCC. The event is scheduled for the first week of June and testing is scheduled for the beginning of May. We were also able to attain a letter of consent from CH63 giving us permission to operate under our requested frequencies. (Letter is attached)

We just received word from our FCC Contact that our application needs to be submitted for approval by this Thursday to be able to have the STA just in time for us to test the system as scheduled in May.

Please contact me and let me know if there are any issues or concerns.
Your attention and help with the application is greatly appreciated.
