Experiment 0230-EX-PL-2004

---

Message:

Hello,

My name is Vu Nguyen. Currently I'm working as Senior Test Engineer in Motorola. I received a letter on Fri 23, 2004 from Mr. James Burtle which stated that Motorola's submission for Experimental License is denied due to FCC did not receive response from Motorola.

I sent an email to FCCInfo@fcc.gov for the application status. I received the reply back on Thu 1/15/2004 12:35 PM which said the application is in Pending status.

I did not receive an email from Mr. Anthony Serafini which asked for Motorola's response. I only know about Mr. Serafini's email after I receive the letter from Mr Burtle then I went to check on the status on the FCC website.

About the email from Mr. Anthony Serafini which has Reference number, 2770, asked about Is Motorola developing equipment for export or for government users. I would like to answer:

- Motorola would like to use the frequencies for developing and testing mobile phones since there is no Commercial 1800 MHz band is available.

I would like to know how can proceed proceed from this point? What can Motorola do now?

Please call me at 858-404-2418 or email me at vu.h.nguyen@motorola.com if you need more informations.

I appreciate your helps very much,

Regards,

Vu Nguyen
