

Re: Experimental License Renewal Application
0130-EX-RR-2003

This attachment is filed to notify the Office of Engineering and technology that the number of subscribers utilizing the Proximity System pursuant to the above-referenced license has been reduced to 100 as of October 1, 2003. This is down from 237 subscribers when the application was filed in July 2003.

Although significant progress has been made in phasing out the system, the final 100 subscriber dishes will be the hardest to replace with wireline service. Therefore, although this puts the community well ahead of the projections filed previously with the Commission, the applicant requests that the authorization timeline in the original application not be altered.

Respectfully Submitted,

/s/ James A. Casey
