STA Application 0549-EX-ST-2019
Frequency Coordination Exhibit and Narrative
Pirelli World Challenge (PWC) Automobile Race Series
April 26, 2019 through October 20, 2019**

This application proposes the use of land mobile UHF and 2 GHz microwave channels in the immediate area of Virginia International Raceway, Sonoma Motor Speedway, Watkins Glen International Speedway, Road America (Wisconsin) and Las Vegas Motor Speedway for terrestrial only, international and domestic video production operation; for voice communications and data in support of the automobile racing events at these five locations; and for two-way operational communications during the Pirelli World Challenge Automobile Racing Series, and for testing prior to the event within and immediately surrounding the Sebring Motor Raceway. This application proposes the use of the specified channels and band segments for no more than three days at each location, on the dates specified below. A single production crew will be using the small number of transmitters requested for all of the international and domestic video production covering these race events. All radio frequency operation is being coordinated by MRTC, Ltd. of the United Kingdom on site. The event schedule is as follows:

Pirelli World Challenge Virginia – 26-28 April
Pirelli World Challenge Sonoma – 7-9 June
Pirelli World Challenge Watkins Glen – 30 August-1 September
Pirelli World Challenge Elkhart Lake – 20-22 September
Pirelli World Challenge Las Vegas – 18-20 October

An engineering analysis has shown that there should be no interference to any licensed user of any of the subject bands. However, should any FCC-licensed or United States government station report interference during the proposed operations, operation on that channel or band will immediately cease and not resume unless and until the interference complaint is resolved.

The stop-buzzer contact for this event is Mr. George Hay, who can be reached at +44 (0)7895143146. Alternatively, counsel for the applicant can be reached by mobile phone at any time at 301-351-3795 and will act as an additional stop-buzzer contact for this event as well.

Land mobile channels to be utilized during the race event within the requested band limits have been investigated using the Commission's ULS database and monitored on-site and found to be unoccupied. Technical coordination staff will be on site during the race and channel monitoring and on-site frequency coordination will ensure against any interference.

All communications can also be directed to the office of counsel for MRTC Motorsports Communications:
