

MRTC Motorsport Communications
MRTC, Ltd.
Application for Special Temporary Authority
File No. 1063-EX-ST-2014

PURPOSE OF STA AND FREQUENCY COORDINATION

The purpose of this STA is to further test an automobile racing communications system for voice and telemetry that is in the developmental stage. The tests will occur at two racing events during the months of December, 2014 and January, 2015 at two different racing venues. The system will be deployed by the Dunlop and MCG race team at each location. The race team will use the communications system on a developmental testing basis on behalf of and overseen by MRTC Motorsport Communications.

The events when this system will be deployed are as follows:

Sebring, FL Raceway: December 10-12, 2014 inclusive and January 19-21, 2015 inclusive.
Road Atlanta Speedway, Atlanta, GA January 27-29 inclusive.

The applicant requires for each venue two VHF frequency pairs as specified in this application in the range 164/169 MHz and 163/169 MHz for duplex voice operations; and one simplex voice channel in the 161 MHz range.

The applicant has consulted the ULS database with respect to the VHF channels sought and proposes what are believed to be unoccupied channels in the area of the two Raceways.

The “stop buzzer” contacts on site on behalf of the applicant are, for Dunlop, Mr. Mike McGregor, whose on-site telephone number is +44-(0)7884 114411; and for MCG, Mr. David Funk, whose on-site telephone number is +49-170/8014098.
