FRN: 0007453434

(a) Applicant is an Original Equipment Manufacturer intending to design, manufacture and market radio transmitters for use in the Travelers Information Service per 47 CFR 90.242.

(b) Applicant will develop and test transmitters to insure compliance with all applicable rules. On-air testing in outdoor and indoor environments is essential to the development process. Applicant intends to improve upon existing transmitter designs by improving efficiency and reducing physical space required by the equipment.

(c) Transmitters developed under this authorization will utilize carrier generation and modulation techniques not presently employed by others manufacturing similar equipment, improving utilization of the radio art by investigating methods and implementations new to this product line.
