

This application was intended to duplicate the information as filed under a previous STA, call sign WE9XDR file number 0546-EX-ST-2009

Testing will be exactly as previously authorized under this previous license with the exception that the frequencies of

857.2625 MHz

862.2875 MHz

867.3125 MHz

will be used.

review of frequency allocation within the state of Maine as reviewed my mWave Ind via the FCC web site showed no frequency allocation within <50 miles of our intended operation area.

Transmit time to perform required antenna pattern will be of a duration less than three (3) minutes maximum.
