Exhibit #1, Item #10, Form 442

October 7, 1994

Mr. Frank Wright
Frequency Liaison Branch
Office of Engineering and Technology
Federal Communications Commission
Room 7322
2025 M Street, NW
Washington, D.C. 20554

Dear Mr. Wright:

Please find attached the completed FCC Form 442 for approval of NBC-owned LMES' for use by NBC News on the INMARSAT system for voice communications.

As a news organization, it is one of our primary missions to establish reliable and extended voice communications links when conventional means become unavailable. Disruptions to standard means of telephony, either natural or man-made can be surmounted by taking advantage of the INMARSAT system. There may also be situations where such communications must be established in remote areas where no conventional means are available.

NBC News' primary intent in deployment of these terminals is to report on the events surrounding above mentioned disasters; secondary use would be for logistical communications in the NBC infrastructure, i.e., for coordination of newscoverage resources where alternative communications are not available.

Sincerely,

David M. Grodsky
