Ms. Geri Robinson
Comsat Mobile Communications
Clarksburg, MD

Via Fax: 301 428 5958

Dear Ms. Robinson,

Following please find NBC letter of intent for the Lan Mob terminal which we request be named: "LAN MOB LITE5":

As a news organization, it is one of our primary missions to establish reliable and extended voice communications links when conventional means of same are made unavailable. Disruptions to standard means of telephony, either natural or man-made can be surmounted by taking advantage of the INMARSAT system where footprint coverage permits. There may also be situations where such communications must be established in remote areas where no conventional means are available.

NBC News' primary intent in deployment of these terminals is to report on events surrounding above mentioned disasters; secondary use would be for logistical communications in the NBC infrastructure, i.e., coordination of newscoverage resources where alternative communications are not available.

Sincerely,

David M. Grodsky

EXHIBIT #1, REF ITEM #3, FORM 442

The licensee wishes to modify KO2XGZ, file No. 3426-EX-PL-92 to reflect the updated number of stations included therein.

In April 1993 the licensee submitted a form 442 which added a Mobile Telesystems model TCS-9700; this may have resulted in a different file number than the one given above.

With the present form 442 the licensee adds an additional Mobile Telesystems TCS-9200.

The current number and type of terminals is listed in full in item number 13 of the current form 442.

Dear Mr. Wright,

Please find attached the completed FCC Form 442 for approval of an NBC-owned LAN MOB terminal for use by NBC News on the INMARSAT system for voice communications.

As a news organization, it is one of our primary missions to establish reliable and extended voice communications links when conventional means of same are made unavailable. Disruptions to standard means of telephony, either natural or man-made can be surmounted by taking advantage of the INMARSAT system. There may also be situations where such communications must be established in remote areas where no conventional means are available.

NBC News' primary intent in deployment of these terminals is to report on events surrounding above mentioned disasters; secondary use would be for logistical communications in the NBC infrastructure, i.e., coordination of newscoverage resources where alternative communications are not available.

Sincerely,

David M. Grodsky
