Mr. James Burtle
Chief, Experimental Licensing
445 12th Street SW
Washington, DC 20554

Mr. Burtle;

We respectfully request your assistance in expediting our application for an experimental license to operate a low power video and audio transmission system. This system will be used in conducting scientific research on terrestrial animals in their natural habitat. The system will permit research scientists to monitor the behavior of terrestrial animals in the wild while reducing the impact associated with the presence of humans. Due to the nature of the research, there are stringent biological deadlines imposed and need to have our system licensed before Mid-August. We greatly appreciate any assistance you may be able to provide in this matter.

Respectfully,

Edward Farren
Senior RF Engineer
