Re: Navini Networks, Experimental License
-- Information Request --

Dear Mr. Ungar:

I wanted to follow up on our telephone conversation of April 24, 2002, where we discussed the request of Dallas MDS Partners ("Dallas MDS") for information concerning the operations of Navini Networks, Inc. ("Navini") under its experimental license as it may affect the operations of Dallas MDS' station, Call Sign, WMY464. Subsequently, Navini filed its letter of April 26th with the Commission indicating that it has "committed itself to experimental activities that are benign to its neighbors."

In that regard, Dallas MDS respectfully requests such technical information regarding Navini's experimental operations within the Dallas MDS protective service area (including Navini's network base station and subscriber units) as would assist Dallas MDS to evaluate the impact of those operations upon an adjacent channel licensee. Dallas MDS believes that such information should include to the extent possible:

- Base Station Information: antenna height, antenna pattern, transmit power level, number of carriers and widths, modulation type and duration, carrier frequency tolerance and out-of-band emissions, and transmitter final output filter mask pattern; and,

Mr. Robert J. Ungar, Esq.

May 1, 2002

Page 2

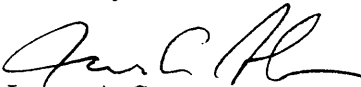

- Subscriber Station Information: in addition to those items requested above for Base Station Information, include types of subterminals (e.g. fixes, mobile, personal, etc.).

In the event you believe the matter continues to require counsel's participation, please feel free to contact me. Otherwise, Navini may forward the information directly to:

Saleem Tawil, P.E.
Dallas MDS Partners, Inc.
111 Congress Avenue, Suite 2530
Austin, Texas 78701
Tele: (512) 478-3400
Fax: (512) 478-3872

We look forward to working with you to resolve this matter.

Cordially,

James A. Stenger
