Dear sir/madam,

In reply to the email, I am hereby providing an exhibit as to the purpose of the GPS Networking re-radiating kit (model VGHNRRKIT)

Here is the direct link to the manufacturer's website from which we bought this kit:

<http://gpsnetworking.com/gps-re-radiating-kits.asp>

VGHNRRKIT technical product data:

<http://gpsnetworking.com/datasheet%20replacements/VGHNRRKIT.pdf>

Navman Wireless produces GPS fleet tracking software for the construction and school bus industries. Our hardware receives less than optimal GPS connection inside our suite so our intention is to have the roof antenna mounted on the roof, for which we already got HOA and City approval, and have it hooked up to the re-radiating amplifier/antenna inside the suite.

Please let me know if you require further information.

Sincerely,

Assaad Bou-Ghosn

Principal QA Engineer
