

NAVSYS CORPORATION

Rationale for Extension of Existing STA

Reference: File Number 0614-EX-ST-2005 dated October 14, 2005

This is to document the reason for our request for extension of the special temporary authority (STA) 0752-EX-ST-2004, granted in 2004. We would have filed a form 442, but due to pressing program requirements, we need this STA to be approved in the time frame requested.

Understanding the cycle for approval of an STA is much quicker than for an experimental radio station authorization, we appreciate your understanding of our situation. It is our intent to aggregate existing and new program information so that we can file the form 442 for all programs that require operation in the designated frequency band (902.00 – 928.00 MHz).
