

EXPLANATION REGARDING REQUEST FOR MODIFICATION OF LICENSE

Neptune Technology Group, Inc., (“Neptune”), licensee of experimental license call sign WE2XDE, hereby seeks FCC authority to modify its license to specify two additional locations. No other changes are proposed.

These sites are needed as Neptune continues to expand its operations, and to test new technology that will be used by utility companies seeking to fully automate their meter-reading activities. Such systems allow utility companies to significantly reduce errors in billing and administrative inefficiencies, thus offering improved service to the public.
