Subject: File 0225-EX-RR-2006

John,

Ref: File 0225-EX-RR-2006, call sign WD2XKS

This is in response to your telephone call to me on 12/20/06. The antenna gains are 38.7 dBi for the 5925-6425 MHz range, 38.7 dBi for the 6525-6875 MHz range, 40.4 dBi for the 10700-11700 MHz range, and 39.0 dBi for the 17700-17800 MHz range.

We are requesting renewal of our license (call sign WD2XKS), and nation-wide authorization. The following statement explains our need for this renewal:

"This nation-wide authorization is required because Nera has a need to put on pre-production demonstrations to potential customers."
