FCC Experimental Operation License Request.

Please see additional document submitted on your electronic filing page.

This request is to operate the described system during testing and qualification under a contract from the State of Minnesota Department of Transportation, in cooperation with the USDOT-FHWA Innovative Ideas program.

This system will be tested in a rural suburban area. Ultimate implementation and deployment of system will designed for rural environments.

See Concept of Operations Document for details of devices. The intention of this project is to eventually have the system and devices deployed be approved under FCC part 15-245 Field Disturbance Sensors. Some of the devices used during the test already are approved under Part 15.

Thank you for your consideration of this request.
