

Exhibit 3
Amendment of Antenna Location

New ICO Satellite Services G.P. ("ICO") holds an experimental authorization, call sign WE2XLQ, effective March 7, 2008 to April 1, 2009.

ICO seeks to amend its experimental authorization to modify one antenna site. To align and to improve the testing process of the original request, ICO needs to alter its planned siting of the following antenna location:

- 1) Las Vegas, NV (North 36°10'50", West 115°19'4")

ICO seeks to replace the above antenna site with a cellsite-on-wheels (COW) at the following antenna location:

- 1) Henderson, NV (North 36°2'15", West 115°01'45")

All other characteristics of the antennas and emissions remain the same.
