

EXHIBIT 4

Antenna Height

The height of the proposed mobile antennas will be less than 6 meters above the ground. The proposed additional gateway equipment, the Gateway Appliqué, will interface to the current Globalstar gateway and will use the same antennas licensed to that gateway under FCC Call Signs E970199, E000342, E000343, E000344, and E000345 (*see* File Nos. SES-LIC-19970310-00343, SES-LIC-20000706-01091, SES-LIC-20000706-01092, SES-LIC-20000706-01093, and SES-LIC-20000706-01094). Accordingly, the Commission and Federal Aviation Administration have approved the structural specifications for those gateway antennas. Globalstar, L.P. is not seeking any changes to the height of its existing gateway antennas.
