

### **EXHIBIT 3**

#### **License Revocation**

Pursuant to a Memorandum Opinion and Order (“MO&O”), issued January 30, 2003, the International Bureau declared null and void the authorization held by Globalstar, L.P. (“Globalstar”) to construct, launch and operate a mobile satellite service (“MSS”) system in the 1990-2025 and 2165-2200 MHz frequency bands.<sup>1</sup> The Bureau found that Globalstar’s construction arrangements were insufficient to meet the initial construction milestone requirement specified in its authorization. Globalstar subsequently filed an Emergency Application for Review and Request for Stay (the “Petitions”), on March 3, 2003, seeking reversal of the MO&O and reinstatement of its 2 GHz MSS authorization. The Petitions are pending before the Commission.
