

Question 5: Statement of Foreign Government Use

NextWave Wireless Inc. ("Applicant") requests this experimental authorization for the exclusive purpose of developing WiMAX equipment in the 3410 – 3450 MHz band for export to be employed under the jurisdiction of several European countries. There is no contract number associated with this application, however, because the experimentation isn't being conducted pursuant to a current government contract. See Applicant's "Request for Experimental Station Authorization under Part 5 of the FCC's Rules" exhibit for a more detailed description of Applicant's experimentation.
