

Request for Confidential Treatment

Pursuant to Sections 0.457(d) and 0.459 of the FCC Rules, 47 C.F.R. §§ 0.457(d) and 0.459, the Freedom of Information Act, 5 U.S.C. § 552 (“FOIA”), and the Trade Secrets Act, 18 U.S.C. § 1905, Nokia Federal Solutions Inc. (“Nokia Federal”) respectfully requests that the information identified below not be placed in the public file and be otherwise withheld from public inspection. Pursuant to Section 0.459(e), Nokia Federal requests that the Commission return the confidential materials identified herein if the request for confidentiality should be denied.

(1) Identification of the specific information for which confidential treatment is sought:

Nokia Federal seeks confidential treatment for the exhibit entitled “Narrative” attached to Nokia Federal’s application, OET File No. 0802-EX-CN-2026, for an experimental license (the “Confidential Information”).

(2) Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission:

The Confidential Information is being submitted in connection with Nokia Federal’s application for an experimental license referenced above.

(3) Explanation of the degree to which the information is commercial or financial, or contains a trade secret or privilege:

The Confidential Information contains highly confidential commercial information, technical data, and trade secrets, the release of which would cause substantial harm to Nokia Federal by revealing to its competitors non-public information about Nokia Federal’s testing products and Nokia Federal products currently under development.

(4) Explanation of the degree to which the information concerns a service that is subject to competition:

The Confidential Information relates to Nokia Federal’s plans relating to portable 5G base station technology, which is a fiercely competitive market. Nokia Federal and its competitors carefully guard information about products in development.

(5) Explanation of how disclosure of the information could result in substantial competitive harm:

The release of the Confidential Information would provide Nokia Federal's competitors with non-public information concerning Nokia Federal products currently under development and disclose confidential information about Nokia Federal's testing processes. This information, which is not made public by industry participants, could be used to disadvantage Nokia Federal in the marketplace.

(6) Identification of any measures taken by the submitting party to prevent unauthorized disclosure:

Nokia Federal treats the Confidential Information as confidential and proprietary. Information relating to Nokia Federal's products under development and its testing processes is made available only on a "need-to-know" basis to the extent necessary for the operation of its business. For example, all employees and contractors who use Nokia Federal's test systems are subject to non-disclosure agreements pursuant to their work for the company.

Nokia Federal will exercise strict control over the devices subject to its experimental testing to prevent any risk that such material could be identified or evaluated by a member of the public or a competitor.

(7) Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties:

To the best of Nokia Federal's knowledge, as of the date of this submission, the Confidential Information is not publicly available and has not been disclosed to third parties except under nondisclosure agreements or equivalent protections.

(8) Justification of the period during which the submitting party asserts that material should not be available for public disclosure:

Given the sensitive nature of the information contained therein, Nokia Federal requests that the Confidential Materials be withheld from public disclosure by the Commission for an indefinite period, or for the maximum permissible time. Even if the products in development ultimately are released, the Confidential Information would still reveal non-public and confidential information concerning Nokia Federal's product testing processes.
